Residential Roof Sheathing Form

Yavapai County Building Inspectors may accept this completed Residential Roof Sheathing Form for review and approval by the building inspector in place of a physical roof sheathing inspection.

Roof sheathing must not be covered prior to approval of the inspection. If covered before inspection, the inspector may require that all or a portion of the roof covering be removed.

In addition to the completed form being provided, the inspector has the option of physically inspecting the roof at sheathing. A ladder must be available for the inspector to access all portions of the roof. The ladder is required to be properly secured and in good condition.

The form shall include validation below of the following:

- Roof sheathing properly rated spaced and oriented
- Sheathing type and thickness per issued construction documents
- Nailing per issued construction documents

The installer or contractor validates that the installation complies with the issued construction documents, and all adopted Yavapai County codes, policies, and ordinances, and assumes liability for the roof sheathing installation.

Indicate the sheathing type and thickness installed: _____

I have read and agree to the above statement: _____
Print Name of Installer/Contractor

_____
Signature of Installer/Contractor

Date: _____ Assessor's Parcel Number: _____

This document shall be scanned into the permit file and attached to Permit # _____
