Driveway Permit Application

If your driveway connects to a county road, you need a driveway permit. Here's how it works:

1. **Step 1: Apply**
   - Fill out this form and pay **$35.**
   - Mark where your driveway will meet the road with **stakes or flags**.
   - Public Works will come look at the spot to see if you need a **culvert** (a pipe that lets water flow under your driveway).
   - If no culvert is needed, you're done.

2. **Step 2: If a Culvert Is Needed**
   - Public Works will figure out the **cost of labor and materials**.
   - Once the fee has been paid**, the County will install the culvert**.

Note: Payments are made to Planning & Zoning, either in person or online. For more information call us at 478-986-5117.
